

Roosting Stuff, January-February 2016

Contributed by Jos
Last Updated Sunday, 26 March 2017

In the depths of underground chambers, vaults and tunnels, sharing a winter home with roosting Daubenton's Bats and unusually good numbers of Barbestrelles this year, the first butterflies of the year were found – Peacocks hibernating in good numbers in virtually all sites visited, mostly in the sections nearer the entrances to the outside world. YEAR LIST

- 1. Peacock.
